Le Grand Set, film studio

Press Kit 2021

The first large film studio to open its doors in the south-west France

Set up in 2020, Le Grand Set is the first large film studio in this part of France. With a total surface area of 1,200m² and a 500m² film set, the new studio is dedicated to producing films, TV series and any other audiovisual work. The studio is designed to provide ideal conditions for filming, with facilities including a soundproof film set with truck access, a design workshop, dressing rooms, offices, a catering area and customised production services. Located on the outskirts of Toulouse just a few minutes from Toulouse-Blagnac airport, Le Grand Set opens new prospects for regional film production.

FILM STUDIO, EQUIPMENT :

- Surface area : 1,200m²
- Design workshop, available for rent
- Dressing rooms, make-up area, styling area
- Offices
- Meeting rooms
- Catering : fitted kitchen and relaxation area
- Unlimited WiFi and fibre broadband access

FILM STUDIO, TECHNICAL DESCRIPTION :

- Dimensions: 20m wide x 25m long x 7m high
- Set soundproofed from floor to ceiling
- 2-sided cyc wall: 20m x 25m
- Motorised lighting truss: 15m x 15m
- Truck access: special heavy duty floor with direct access for trucks

A full-size aircraft mockup, fully modular and customisable

Le Grand Set also has a full-size aircraft mockup, available for rent. It decided to create this set quite simply because it is often extremely complicated to shoot a scene in the cramped interior of a real aircraft cabin.

The only one of its kind in France or in Europe, this mockup is a boon for directors who are frequently tempted to abandon any idea of shooting a scene in this type of environment. Named LF7, the mockup offered by Le Grand Set is based on current airliners but without the design features used by leading aircraft manufacturers, thereby giving scriptwriters total freedom. Looking beyond this original design, the LF7 cabin is also fully modular : a wide range of configurations are available to meet all filming requirements, and everything can be accessorised and customised.

Available for rent on the premises of Le Grand Set, the LF7 modules are also transportable, and can also be delivered and installed at other shooting locations.

Demonstration film : shot onboard the LF7

Le Grand Set, a Master Films concept

Le Grand Set is a concept designed and created by Master Films, a Toulouse-based production company and historic partner of the region's leading aerospace players, managed by Bernard Birebent and François Cadène. The company tasked Laurent Foulquier, chief designer for 25 years and head of the design workshop, with creating the LF7. Working with his team of experienced designers, he also creates the accessories required to customise the aircraft cabin, as well as overseeing the installation and delivery of the various LF7 modules. Based in the studio's 280m² design workshop, the team

also designs and builds sets for television and cinema. A production manager for over 20 years, Delphine Comin welcomes production teams, providing personalised support for the organisation and coordination of film shoots. Do you need to shoot scenes on location? Le Grand Set is able to provide information on all the shooting locations available across the region.

Claude Exposito is the key contact for all the partners of Le Grand Set, including the main aerospace sites in the Toulouse region, as well as Transpalux, a supplier of technical equipment for filming.
